CAMP SYSTEM

A ready to install complete Solar System

for your Camp, Shed, Workshop, or

BACKUP POWER for your

sump pump, freezer, lights etc. !!

Kit includes

Solar panel

1000 watt pure sine wave 'GO Power' inverter

Charge controller

4 each 6 volt deep cycle batteries

Battery cables and

50 ft of cable for solar panel.

The inverter, charge controller and fuse

block come pre-mounted and pre-wired

Battery wiring instructions included.

The Camp offers simple “plug & play” installation and 1,000 watts of off-grid power for water pumping, power tools, lighting, entertainment, and etc.

Finally, dependable, quiet power for AC and 12-volt DC loads. It charges all week for your weekend pleasure—and is expandable—in case your weekender gets to be too much fun for just 2 days!
